not only in sociopolitical, but also physical context

diun nokev al arachim she meaimim lehealem me ha olam

in Illegal movement, mega issues as; industry and nature, commerce, mass production, consume and environmental matters, confronted with individuality immigration. body praxis's and the human condition.

Through out this work,

I explore the mechanism behind taboos in order to enable different perspective on fixed perceptions and rigid notions.

I concretize general vague notions that are used as argumentations by people that hold pre-conception and pre-judgment against other people.

I challenge pre-expectations by diffusion of cultures, languages, music and pre conditioned gestures using visual, physical and audible manipulations

I discuss different approaches that people have to their bodies.
And explore the means of the phenomena of "clubs".

I raise questions about the constant tension between Individual and mass society
